

FOOD SCIENCES CORPORATION

Product Quality Statement

Food Sciences Corporation is a manufacturer and packager of food and dietary supplements for human consumption with production and warehousing facilities located in Mt. Laurel, New Jersey. We are committed to providing our customers with high-quality, safe and nutritious products through our integrated food safety and quality programs, regulatory compliance and the application of industry best practices.

All Food Sciences products are manufactured in compliance with the current Good Manufacturing Practices (cGMP) listed in the United States Code of Federal Regulations and are labeled in accordance with all applicable requirements under the Nutrition Labeling Education Act (NLEA) and Dietary Supplement Health and Education Act (DSHEA).

As an additional measure in our commitment to food safety and quality - Food Sciences Corporation is certified by SCS Global Services (SCS), a third party auditor, under the Safe Quality Food (SQF) Standards. In addition to inspections regularly conducted by SCS and the FDA, independent audits are conducted to ensure all aspects of production are performed at levels which assure optimal product quality.

We utilize only high quality ingredients which are tested for safety, nutritional content and functional application. All materials are sourced from vendors approved under our Supplier Approval Program which requires the submission of samples for evaluation and official documentation certifying their products.

To ensure finished product lots meet all expectations, comprehensive sampling and evaluation is conducted during and after production and includes testing for all functional, organoleptic and food safety specifications prior to product release. Vendor Specifications and Certificates of Analysis along with strict adherence to approved formulation and manufacturing requirements assure final label accuracy.

We stand behind the safety and quality of our products and are pleased to provide both technical and marketing support to our clients as needed.
